

Junior Post-doc Position

The Group of Research in Neuropsychopharmacology and Psychobiology (CTS-510) of the University of Cádiz (Spain) that is affiliated to the Spanish Mental Health CIBER network (CIBERSAM) is seeking for an outstanding junior post-doc.

Applicants should have good training background and publication track record and should be within the first 5 years following PhD defense. Applicants will enroll in one of the following research lines:

Major Area 1: Pain & Mental Disorders comorbidity.

Major Area 2: Human olfactory neuroepithelium-derived neural progenitor cells as a model for studying psychiatric disorders.

We offer a 3 years full contract (41,450€/year). In addition, selected candidate will have our support to apply for tenured positions at the University of Cádiz.

Send inquiries & applications (complete CV, including the list of publications) to: Esther Berrocoso (esther.berrocoso@uca.es)

Deadline for applications: June 5th, 2020.
